

Market Research Report: Renters/Tenants App

1. User Group Profile

Demographics

- **Age:** Majority between **19–25 years old**, often recent graduates, college students or young families.
- **Income:** Wide range; often **\$30,000–80,000 annually**. Many live paycheck-to-paycheck or allocate **30–40% of income** to rent.
- **Education:** Predominantly college-educated or pursuing higher education.

Pain Points

- Rising rents and affordability challenges.
- Difficulty with communication and transparency with property managers.
- Tracking rent payments, maintenance requests, and fees.
- Limited financial planning tools to help manage housing expenses.

Habits

- Heavy reliance on **mobile apps** for payment, communication, and reminders.
 - Prefer **digital rent payment** options over checks/cash.
 - Use social media, online forums (Reddit, Facebook housing groups), and rental apps (Zillow, Apartments.com) for advice and housing searches.
 - Value **convenience, speed, and transparency** when managing housing.
-

2. Market Size & Opportunity

- **U.S. renter households:** **~44 million households** (35% of all households).
- **Market value:** U.S. property rental industry worth over **\$270 billion annually**.
- **Trends:**
 - Rising housing costs create a need for budgeting and rent-tracking tools.
 - Growing preference for digital-first solutions—over 60% of renters paid rent digitally in 2024.
 - Increase in young renters postponing home ownership.

Opportunity: A renter-focused app that integrates financial management, communication with landlords, and digital payment support can capture significant market share, especially among millennials and Gen Z renters.

Feature / App	Zillow Rentals	Apartments.com	Zumper	Gap / Limitation
Search for rentals	✓ Extensive listings	✓ Extensive listings	✓ Listings & alerts	Focus only on finding housing
Online rent payment	✗ Limited	✗ No	✓ For some properties	Not universal, fragmented
Maintenance tracking	✗ No	✗ No	✗ No	Missing renter support features
Financial planning tools	✗ No	✗ No	✗ No	No expense/rent budget integration
Renter-focused community	✗ No	✗ No	✗ No	No community or support element

3. Competitor AnalysisKey Takeaway:

Most apps focus heavily on rental discovery, not on ongoing renter experience (payments, communication, financial health). This leaves a gap for an app designed for current tenants, not just future renters.

4. Unique Value Proposition (UVP)

Our app stands out by being the “**one-stop hub for renters**”, not just a housing search tool. It focuses on:

- **Seamless rent management:** Digital payments, reminders, and rent history tracking.
- **Tenant-landlord communication:** Easy maintenance request system, message log, and document storage (leases, receipts).
- **Financial empowerment:** Budgeting tools, expense breakdowns, and rent-to-income ratio analysis.

- **Community:** Tips, forums, and renter rights resources to support tenants.

Unlike competitors, this app is **built for the renter experience after move-in**, addressing the pain points of millions of tenants nationwide.

5. Graph / Visualization

Renter Occupied Housing (2023)

(44 million renter households out of 124 million total U.S. households, U.S. Census Bureau).

6. AI Use Section

GenAI Tools Used:

- **ChatGPT (OpenAI GPT-5):** Generated draft profiles of renters, competitor analysis, and UVP ideas.

- **Perplexity AI:** Pulled recent market data and statistics with citations.
- **Claude (Anthropic):** Used for refining user pain points and habits.

Prompts Used (Examples):

- “Give me a demographic and behavioral profile of U.S. renters (2024–2025).”
- “Compare top rental apps like Zillow, Zumper, and Apartments.com on features and gaps.”
- “Provide U.S. housing rental market size and opportunity for digital apps.”
- “Please enhance this given report to make it sound more professional.”

Fact-Checking Process:

- Verified statistics with U.S. Census Bureau (2024 Housing Data) and Statista rental market reports.
- Cross-checked app feature comparisons by reviewing official websites and user reviews on App Store/Google Play.
- Ensured that our findings aligned with various findings from companies such as Arbor Realty Trust, or Forbes.
